

NANO IV

PERFECT FINISHES

PRODUCT INFORMATION SHEET

NANO IV PERFECT FINISHES

A new generation of high performance detail products

NANO IV PERFECT FINISHES products have nano-sized particles that are much smaller than most cutting and polishing agents and get deeper into the surface of the paintwork. This technology produces a more even and smoother barrier to harmful particles that may otherwise attack or bond to the paint. **NANO IV PERFECT FINISHES** compounds and cleaners use ultra-fine nano-sized abrasives to ensure a complete removal of scratches and swirls to produce those **NANO IV PERFECT FINISHES**. All **NANO IV PERFECT FINISHES** products are VOC compliant.

- **3231 NANO IV Rubbing Compound**
 - Nano-tech ultrafine cutting abrasives.
 - New generation cleaners
 - Little spatter and sling.
- **3232 NANO IV Machine Polish**
 - Levels imperfections and removes swirls
 - Restores a glassy, smooth shine
 - Easy clean up
- **3233 NANO IV Ultra Fine Polish**
 - Protects painted surfaces from UV rays and surface contaminants
 - Generates a deep, rich gloss and a smooth surface
 - Total compatibility with scratch-resistant and ceramic clear coat lacquers
- **3234 NANO IV Clean & Shine**
 - Fast and easy-to-use
 - Use on paint, chrome, vinyl and glass
 - Cleans up compound and polish residue
- **3235 NANO IV 1-Step Cleaner/Wax ***
 - Fills minor scratches and produces deep, vibrant color
 - Provides protection against oxidation, UV rays and surface degradation
 - Produces a long lasting protection and shine
- **3237 NANO IV Paint Sealant: ***
 - Helps keep car surfaces blemish-free longer
 - Protects against weather, corrosion and pollutants
 - Instantly repels pollutants or enables their easy removal * Not body shop safe
